SKILLS

Core	React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks & UI	Next.js, Tailwind CSS, Bootstrap, PrimeReact, GSAP, Redux Saga, Redux Toolkit
Architecture	Component-Driven & Feature-Driven Design, Clean Architecture, Monorepo, LLD, RBAC
Testing & Perf	Lighthouse CI, Puppeteer, Web Vitals, Accessibility (a11y), Cross-browser Compatibility
Tools	Claude Code, GitHub Copilot, Agentic AI Workflows, Git, AWS, Postman, Mockoon

WORK EXPERIENCE

SDE 2 — Frontend Engineer

Jan 2026 – Present

Junglee Games

Gurugram, India

- Architected a reusable component system powering a **promo code & discount platform** for **800K+ users**, with dynamic forms, configurable validation, and multi-code stacking.
- Owned **end-to-end payment gateway integration** (retries, failure handling, reconciliation), **cutting failed-transaction drop-offs**.
- Instrumented **conversion tracking across 3 core funnels** (registration, deposit, gameplay), unlocking spend attribution and campaign ROI visibility.
- Led migration to a **feature-based modular architecture** spanning **60+ admin screens** across **24 feature domains**, consolidating duplicated UI into shared libraries.
- Unified web and mobile delivery into a **single monorepo** with shared auth, state, and utility packages.
- Shipped **Instant Wins** prize flows and a **daily spin-to-win coin-credit system** with cooldown-gated eligibility.

SDE 1 — Frontend Engineer

Aug 2024 – Dec 2025

Junglee Games

Gurugram, India

- Delivered **4 gamified engagement features** — Spin the Wheel, Slot Machine, Streak Challenge, Drop or Not — with real-time state sync and full accessibility support.
- Built **schema-driven UI component libraries** adopted across **multiple product teams**, cutting feature build time and redundant implementations.
- Implemented **role-based access control spanning 20+ granular permissions** with time-gated visibility rules; **mentored junior developers** on architecture standards.

Frontend Developer

Jan 2024 – Jul 2024

Fly Realty

Bangalore, India

- Shipped a **production real-estate web platform** end to end, owning responsive layouts, async state management, and cross-browser compatibility.
- Automated **performance and accessibility CI pipelines** gating builds on Lighthouse and a11y thresholds, **preventing regressions** pre-release; built a **web-to-native bridge**.

PROJECTS

All-Spark — Event Booking Platform [GitHub] [Live]: Solo-built Next.js/TypeScript/PostgreSQL platform — *Frontend*: seat-map booking, OTP accounts, QR tickets; *Backend*: Razorpay payments with HMAC-verified webhooks, seat locking, notifications; *Admin*: RBAC dashboard for bookings, refunds, and audit trail.

Study Notion — Ed Tech Platform: React.js + Tailwind CSS frontend with reusable component library, responsive layouts, and RESTful API integration for instructor-learner flows.

Shoppingooo — E-Commerce Platform: React.js UI with Stripe payment flows, dynamic product pages, cart management, and Cloudinary media.

EDUCATION

MCA — Masters in Computer Application, Vellore Institute of Technology	2022 – 2024	CGPA: 8.89/10
BCA — Bachelors in Computer Application, Kristu Jayanti College	2019 – 2022	CGPA: 9.04/10

ACHIEVEMENTS

- Troubleshooter, Top Rookie & Spot Awards** — Recognized for outstanding frontend contributions at Junglee Games.
- IBM Hackathon 2020** — Runner-up; built rapid UI prototype under pressure demonstrating strong frontend execution.
- Competitive Programming** — Solved 800+ problems on LeetCode and GeeksForGeeks; strong in DSA and problem-solving.
